

# Opening science to meet future challenges

Warsaw

March 11, 2014

Deadline for paper proposals: January 31, 2014

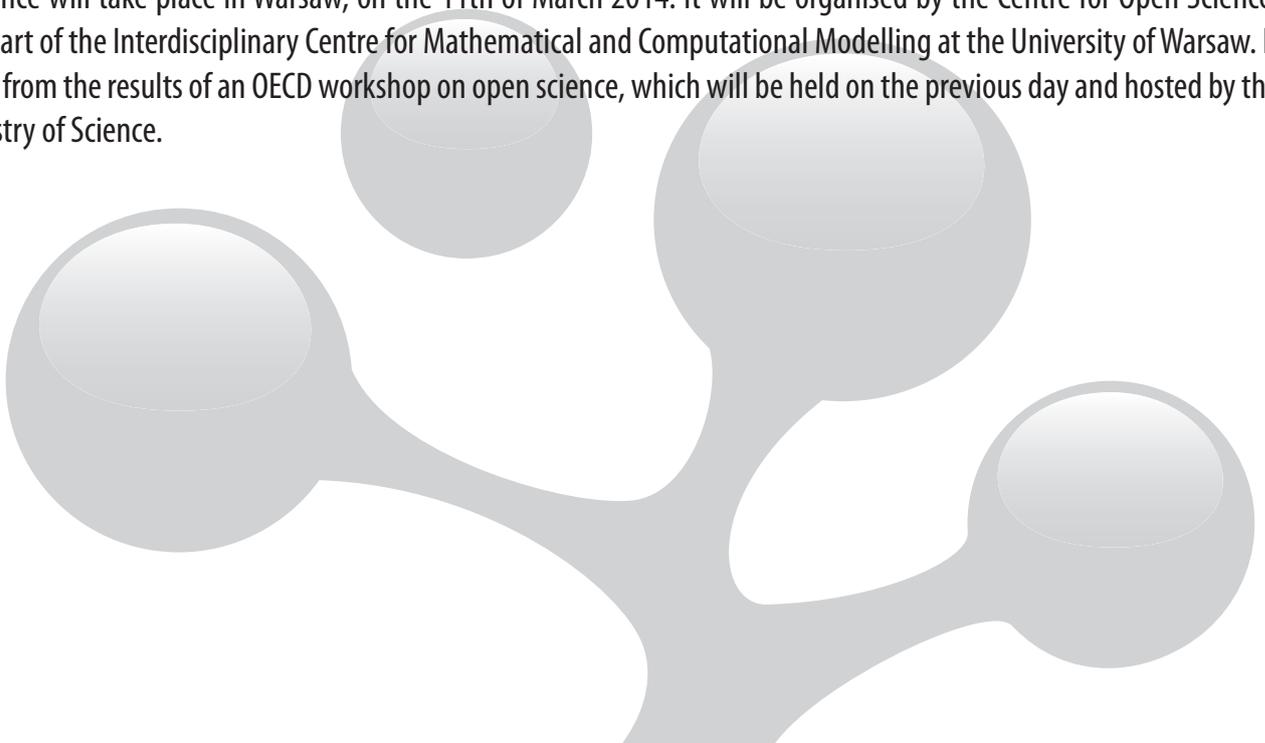

## Opening science to meet future challenges

Open access to scientific publications is already recognised as a standard for the dissemination of knowledge. Researchers publish in open access journals and deposit their works in open access repositories. All over the world institutions such as governments, research funders and universities implement open access policies. But Open Science is not only about open access. The pilot on Open Research Data in Horizon 2020 provides a prominent example of moving towards openness of data. The scope of Open Science also includes other phenomena, such as open notebook science or open peer-review.

All the elements of Open Science can be implemented in different ways, not all of them suited to the contemporary and future needs of our society. Therefore, a time has come for a vigorous debate on the meaning of openness for the future of science and its applications among the key stakeholders, such as researchers, universities, funders, entrepreneurs, publishers, taxpayers, etc.

The conference “Opening science to meet future challenges” will bring together diverse participants to enable an in-depth international dialogue focused on infrastructural, social, economic and legal aspects of openness (in particular, with regard to data), aimed at a common understanding of how it should be provided in order to satisfy the public interest and meet the upcoming challenges.

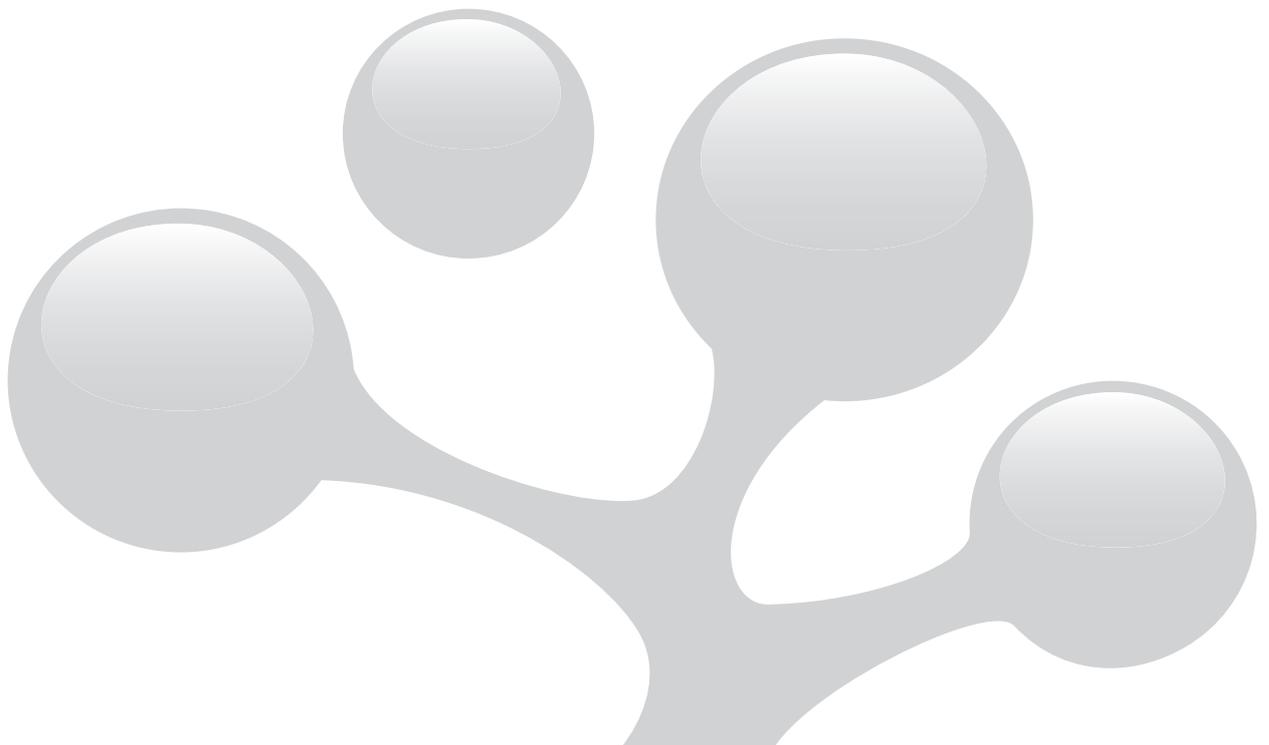

The conference will take place in Warsaw, on the 11th of March 2014. It will be organised by the Centre for Open Science, which is a part of the Interdisciplinary Centre for Mathematical and Computational Modelling at the University of Warsaw. It will benefit from the results of an OECD workshop on open science, which will be held on the previous day and hosted by the Polish Ministry of Science.

## All submissions relevant to open science are welcome. Main topics of the conference will include:

- open access in social, political, legal, economic and infrastructural perspective;
- open access journals: publishers' and scientists' perspective, quality, business models;
- open access repositories: tools, case studies, challenges and advantages;
- open mandates;
- open licences;
- open data;
- open notebook science;
- open peer review;
- citizen science.

## Deadlines

- January 31, 2014: deadline for abstract submissions
- February 15, 2014: deadline for registration
- February 28, 2014: deadline for presentation upload

## Submission Format

The official language of the conference is English. Abstracts should be submitted by e-mail to [conference@ceon.pl](mailto:conference@ceon.pl).

The abstract length can be up to 400 words. Presentations in the tracks will last 15 minutes and will be followed by 5 minutes of discussion. All submission will be reviewed until 10th of February 2014.
